Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 10-21 are objected to because of the following informalities: The improper dependency of claims. Appropriate correction is required.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 22-23 and 10-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tateshi (U.S. Patent # 6,057,675) in combinations with Wisner et al. (U.S. Patent # 3,978,393) and Jacquet (U.S. Patent # 4,301,502).

Tateshi discloses claimed subject matters a switching regulator with DC-DC converter (figures 1-4 and 5A), including a driver circuit (figure 2, item D1 and D2), the switching device (figure 2, item S1 and S2) and the reference voltage varies with the pulse signal of the control signal generating circuit (Abstract, line 1-13, column 11line 30-70 and column 12, line 1-65). However Tateshi does not disclose the utilization of the technique for the reference voltage is in substantially opposite to the output voltage of the

converter. Jacquet teaches the utilization of the similar technique for the reference voltage is in substantially opposite to the output voltage of the converter (Abstracts, line 5-10). It would have been obvious one having ordinary skill in the art at the time the invention was made to modify Tateshi's regulator circuit with the technique taught by Jacquet for the purpose of enhancing the regulation capability of the converter.

Allowable Subject Matter

3. Claims 19-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
